

Class Notes

It is the design of the Student Workbook for each student to have his or her copy of the chapter pages prior to the beginning of the chapter. The Student Workbook will serve as a structured outline for class notes to be taken by the student as the teacher instructs the lesson. Appropriate “white space” is provided for students to work specific examples, class activities, or journaling space. The teacher has the flexibility to customize examples that are best suited for their students’ needs or interests.
