

Honors Chemistry Student Activity Book Table of Contents

NOTE: Worksheets designated as “*rft” worksheets are “review for test” worksheets

WS1:1 Welcome to Honors Chemistry.....	7
WS1:2 Chemistry – Introduction and First Concepts *rft.....	9
WS1:3 Additional Review of Introductory Concepts *rft.....	15
WS1:4 Equations – Balanced or Unbalanced?	17
WS1:5 Laboratory Safety – Concepts and Practices *rft	19
WS1:6 Chemical and Physical Properties *rft	23
WS1:7 Understanding Density *rft.....	27
WS1:8 The Chemicals Around Us *rft.....	31
WS2:1 Atomic Structure – First Concepts *rft.....	33
WS2:2 Atomic Structure 2 – Emphasizing Electrons *rft.....	37
WS2:3 Elements, Compounds, and Mixtures *rft.....	41
WS2:4 Five Common Types of Chemical Bonds *rft.....	45
WS2:5 Elements, Compounds, and Mixtures - 2 *rft.....	49
WS3:1 Electron Configurations - 1 *rft	51
WS3:2 Electron Configurations of Periods 1 and 2 *rft.....	53
WS3:3 Electron Configurations of the 3 rd and 4 th Series *rft.....	57
WS3:4 Quantum Numbers and Electron Rules *rft.....	61
WS4:1 The Role of Electrons in Chemical Bonds *rft.....	65
WS4:2 Common Types of Chemical Bonds *rft.....	69
WS4:3 Valence Electrons and Lewis Dot Diagrams *rft.....	71
WS5:1 Milestones in the History of Chemistry *rft.....	73
WS5:2 Modern Advances and Historic Experiments *rft	77

WS5:3 Moles, Molar Mass, and Avogadro's Number *rft	83
WS5:4 Mole-Gram Conversions *rft.....	87
WS6:1 Periodicity in Atomic Radii *rft	91
WS6:2 Ions, Ionic Radii, and Ionization Energies *rft.....	95
WS6:3 Electronegativity and Periodicity *rft	99
WS6:4 Periodicity Worksheet 4 *rft	101
WS7:1 Formulas, Oxidation Numbers, and Ions *rft.....	103
WS7:2 Dimensional Analysis *rft.....	107
WS7:3 Six Common Types of Reactions *rft.....	111
WS7:4 Practice With Ionic Formulas *rft	113
WS8:1 Balancing Equations *rft.....	115
WS8:2 Stoichiometry Worksheet *rft	119
WS8:3 Reaction Rates and Equilibrium *rft	123
WS9:1 The Chemistry of Water *rft.....	129
WS9:2 kJ, Changes of State, and Heating Curves *rft.....	133
WS9:3 Molarity and the Chemistry of Solutions *rft.....	137
WS9:4 Evaporation, Molarity, and Calorimetry.....	141
WS9:5 Molarity and Laboratory Solutions *rft	143
WS10:1 The Chemistry of the Gases – First Concepts *rft.....	145
WS10:2 The Chemistry of the Gases – 2 *rft	149
WS10:3 Pressure and Volume – Boyle's Law *rft.....	151
WS10:4 Temperature and Volume – Charles' Law *rft	153
WS10:5 The Combined Gas Law *rft	157
WS10:6 Dalton's Law of Partial Pressures *rft.....	159
WS10:7 The Ideal Gas Equation *rft.....	161
WS10:8 Avogadro's Law and Molar Volumes *rft	165
WS10:9 Review 1 – The Gas Laws *rft	167
WS10:10 The Mathematics of the Gas Laws *rft.....	171
WS11:1 Acids, Bases, and Salts -1 *rft.....	175
WS11:2 Acids, Bases, and Salts - 2 *rft.....	179
WS12:1 Enthalpy and Thermochemistry - 1 *rft	183
WS12:2 Enthalpy, Stability, and Reaction Rates *rft.....	191
WS12:3 Free Energy, ΔG , ΔH , and ΔS *rft.....	195
WS13:1 Organic Chemistry – 1 *rft.....	197
WS13:2 Organic Chemistry – 2 *rft.....	201
WS13:3 Organic Chemistry – 3 *rft.....	203
WS14:1 Oxidation – Reduction Reactions *rft.....	207
WS14:2 Balancing Redox Equations - Half Reaction Method	209
WS14:3 Electrochemistry *rft.....	211
WS15:1 Nuclear Chemistry – Introductory Concepts *rft.....	215
WS15:2 A Transmutation Sequence *rft.....	219
WS15:3 Nuclear Fission – 3 *rft.....	223
WS15:4 Fusion and Stellar Nucleosynthesis *rft.....	227

DM-1 Disappearing Ink – Demonstration Notes	229
DM-2 Observing the Invisible.....	231
DM-3 The Immiscibility Bottle.....	235
DM-4 Safety Equipment and Demonstrations.....	239
DM-5 Modeling an Aqueous Stratification	245
DM-6 Measuring the Invisible – The Demonstration	249
DM-7 Spontaneous Polar/Non-Polar Interactions.....	253
DM-8 Blue Bottle REDOX Reaction.....	255
LB-1 Laboratory Determinations of Density	259
LB-2 Density Strata in an Aqueous System.....	263
LB-3 Atmospheric O ₂ as a Percent by Volume	265
LB-4 Molecular Visualization 1 -- Rasmol	269
LB-5 Paper Chromatography – Separating a Mixture.....	273
LB-6 Part Two - Calculating Chromatographic R-Ratios.....	279
LB-7 Elements and their Bright-Line Emission Spectra	281
LB-8 Counting Things by Weighing Them.....	285
LB-9 Molviz Computer Lab 2 – Interactive Molecules.....	291
LB-10 MS Excel 1 – An Introduction to Graphing.....	295
LB-11 Gold Pennies Lab: Cu → Ag → Au.....	299
LB-12 MS Excel Graphing Reversible Rxns and Equilibria.....	303
LB-13 Calorimetry 1 – The Specific Heat of Copper	307
LB-14 Freezing Points and Colligative Ice Cream	311
LB-15 Charles’ Law and Pressure Disequilibria	315
LB-16 Collecting Molecular O ₂ Over Water.....	317
LB-17 Extraction of DNA – An Informational Polymer.....	321
LB-18 The Polymerization of Nylon.....	325
LB-19 Esterification – Eau, Whatta Lab!	327
LB-20 Reaction Rates – The Q-10 Effect.....	331
LB-21 Molviz-3 Your Own Molecular Movie	335
LB-22 MS Excel - Graphing Fission and Chain Reactions.....	341
LB-23 Data That Exhibit Patterns of Decline	345
LB-24 MS Excel – 3 Common Data Patterns.....	349
ENR-1 A Billion Homework Questions	353
ENR-2 The Best Scholarship There Ever Was	355
ENR-3 Reaction Rates and Equilibria	359
ENR-4 Graph Interpretation	361
ENR-5 Delayed Feedbacks.....	365
Appendix 1 – Reference Table of Thermochemical Data	369
Appendix 2 - The Ion Product Constant of Water	371

NOTE: Worksheets designated as “*rft” worksheets are “review for test” worksheets.
